

# Service Center

International Precision Products B.V. is one of the leading providers of specialized electromechanical and opto-electrical components and subsystems for the European Aerospace and Defence industry. Established in 1973, we have been a reliable partner for industry for almost half a century, with our headquarters and distribution center close to Amsterdam and strategically located offices throughout Europe and Australia. We are now proud to announce that, side by side and in support to our lines of specialised products, we have launched our SERVICE CENTER operations.

## Service Center

Located at our Dutch head office facility, the Service Centre is operated by skilled and experienced engineers and it is equipped with state of the art equipment, all necessary tools and tooling and a safe and certified operating area. All relevant processes and procedures are in place.

### We can provide:

- full service and maintenance operations for all Laserdyne products such as laser rangefinders, displays and solid state recording devices
- basic check-up services for Advanced Navigation navigational products.

Laser range finders

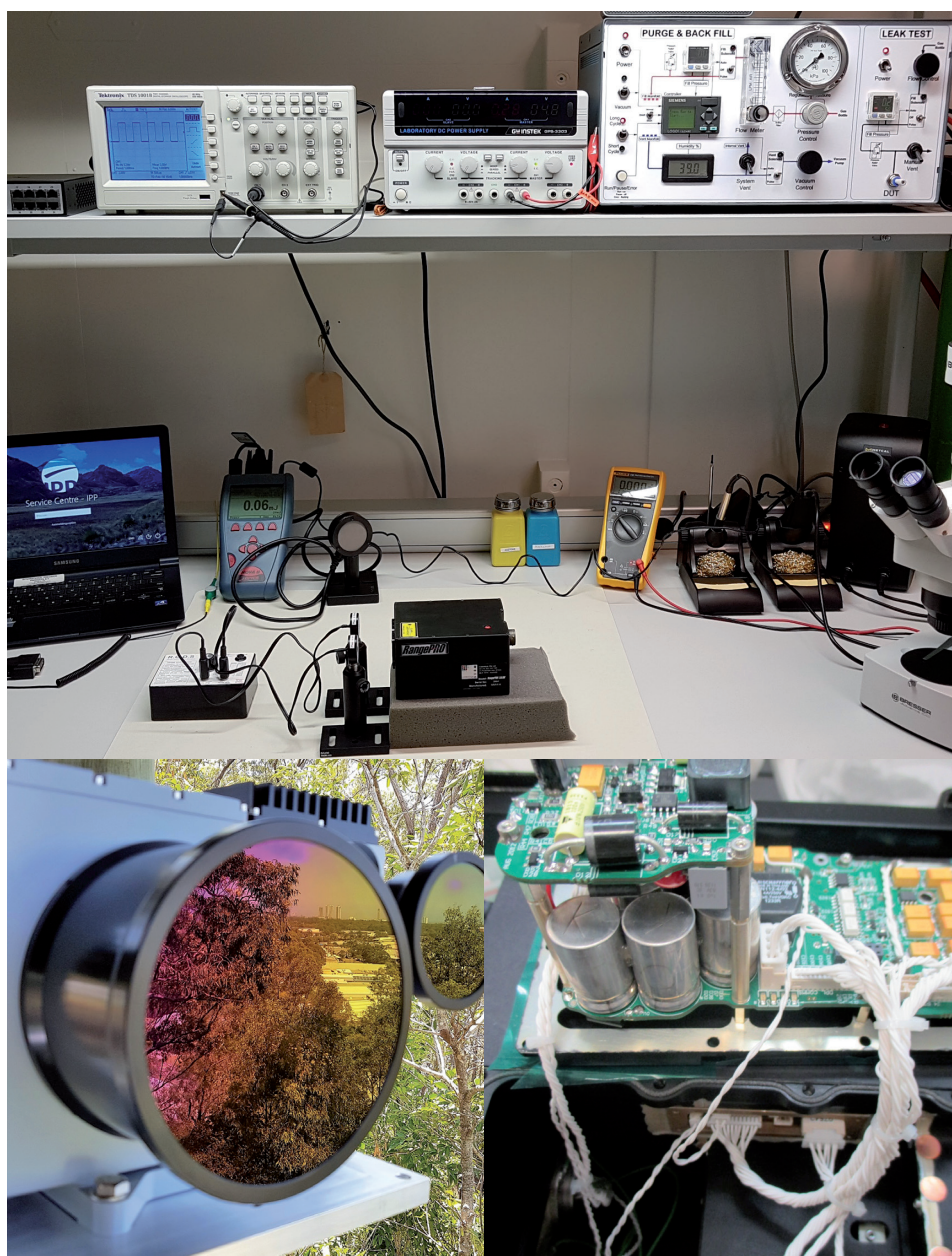

Flat panel displays

Solid state video recorders

GPS aided inertial navigation systems

## Service Center

Our Service Center will provide our customers with full support, analysis and testing capabilities much closer to home.

That will allow us to serve our customer faster for any service requirements they may have:

- troubleshooting / repairs / check-ups / replacements / upgrades
- extended warranty
- annual contracted maintenance and refurbishments
- installation & commissioning support on site
- training

All means faster turnaround times and less downtime at your end.

Support programs to help you extend the life and reliability of your equipment can be offered.

In addition, our service engineers can visit on-site where required to save you time and inconvenience.

## Laser range finders

### Capabilities:

- Troubleshooting
- Repairs
- Cleaning of optics
